Bryant's Comfort and Eco

Keeping Homeowners Comfortable Since 1904

Comfort... reliability... value... these three words perfectly describe the products Bryant® has been delivering since 1904. We've built a solid reputation through a commitment to continuously meet and exceed the changing needs of homeowners just like you. Today, as consumers have become more value-focused than ever, Bryant responds with products like the Model 604D Packaged Heat Pump.

The Bryant Model 604D delivers solid, reliable comfort at 13 SEER (Seasonal Energy Efficiency Ratio) cooling efficiency and 7.8 HSPF (Heating Seasonal Performance Factor) heating efficiency. Designed, built and backed by the most

reliable source for comfort and installed by your trusted local Bryant dealer, the Model 604D is an excellent choice for year-round comfort you can trust.

Durability Built in from the Ground Up

The Model 604D is one solid performer, starting with our high-tech base that combines a lightweight, rust-resistant composite interior with outer base rails for solid support and easier rigging and handling. Add our durable compressor,

corrosion-resistant copper tube aluminum fin coil, and attractive rugged cabinet, and it's easy to see why Bryant backs the Model 604D for years of dependable, worry-free comfort.

Environmentally Sound

Designed specifically for use with Puron® refrigerant, the Model 604D provides an environmentally sound solution for the scheduled phase-out of Freon®-22*. Freon-22, the industry standard refrigerant for many years, is being taken out of production due to environmental concerns. As it becomes less and less available, costs to service heat pumps using Freon-22 may rise (an idea supported by the rise in costs

to service automobile air conditioners using the phased-out Freon®-12*). By choosing Puron now, you are making a decision that is both environmentally and financially sound.

* The registered owner of Freon is E.I. DuPont de Nemour & Co.

Economy Package

Peace of Mind

Having a great warranty helps you enjoy your comfort with confidence. Bryant builds trusted reliability into every product, then provides additional peace of mind with excellent warranty protection.

To the original owner, the Bryant model 604D packaged product is covered by a 10-year parts limited warranty upon timely registration of your new equipment.* Ask your Bryant dealer about optional extended warranties, which may include labor.

* Warranty period is 5-year parts limited warranty if not registered within 90 days. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty. See warranty certificate at bryant.com for complete details.

Performance

Enjoy Comfort and Peace of Mind

You can count on energy-efficient heating and cooling with features like our electronically controlled, programmable blower motor. For peace of mind, reliability testing in all phases of product development from design through final assembly help assure the quality of every heat

pump we make. We follow the toughest testing standards in the industry so you can relax and enjoy the comfort, quality and lasting economy that make Bryant's Model 604D Packaged Heat Pump an excellent choice.

Details Make the Difference

Bryant has become America's trusted name in heating and cooling by paying close attention to the details. The rigid cabinet top of the Model 604D includes a large fan opening to reduce vibration for quiet operation. Exiting air is discharged through the top of the unit to protect flowers, shrubs or other items located near the unit. The high-tech composite base with integrated sloped drain pan can improve

indoor air quality by minimizing potential sources of airborne mold and bacteria. Built-in base rails and mountings help ensure dependable rooftop and ground level installations. And, three separate access panels make installation and routine maintenance easy.

The integrated sloped drain pan design minimizes the amount of condensate that remains in the indoor air cavity, reducing the opportunity for mold, mildew and odors to form.

Home Comfort Components

1 ENVIRONMENTALLY SOUND AND HIGHLY EFFICIENT

Our scroll compressor is designed for use with Puron® refrigerant to provide quiet, smooth-operating comfort and years of trouble-free performance.

2 RELIABLE PERFORMANCE

Our Thermostatic Expansion Valve (TXV) ensures proper refrigerant flow during fluctuating pressures and conditions for top reliability and energy-efficient operation.

3 DURABILITY AND INDOOR AIR QUALITY

On the inside, our premium base is made from a high-tech composite material that will not rust. Sloped drain pan improves drainage to help inhibit mold, algae and bacterial growth. Outside, metal base rails provide added stability as well as easier dealer handling and rigging.

4 ECONOMICAL COMFORT

Is the result of our copper tube/ aluminum fin coil construction. Designed with increased surface area, this coil helps deliver money-saving heat transfer while minimizing the opportunity for corrosion. This means comfort that lasts.

5 YEAR-ROUND INDOOR COMFORT

Can be yours with the installation of Bryant's electric heat option. This accessory is designed to easily fit into the cabinet of the Model 604D to provide supplemental heating during colder times of the year.

6 ENHANCED DEHUMIDIFICATION

Bryant's optional, patented Thermidstat™ Control helps the Model 604D provide enhanced moisture removal for improved summer comfort and efficiency.

7 SUPERIOR CORROSION RESISTANCE

With Bryant's available DuraCoat™ tin-plated coil. This option provides superior corrosion resistance compared to our standard copper tube/ aluminum fin coil for longer life, backed with a 10-year parts limited warranty.
