

Titan Ventilation Kit

UT32-VK-06

UT32-VK-08

The UT32-VK Ventilation Kit is a low-cost combination of our Titan thermostat and supply air ventilation control designed to meet code requirements in both single and multifamily new construction applications. This highly universal control offering meeting ASHRAE 62.2 standard and allows for a fresh air damper to be wired to the thermostat eliminating the need for an additional control. *Kit includes Titan thermostat, 6" or 8" damper and 20VA transformer. Additional damper sizes available upon request.*

Features and Benefits:

- Meets ASHRAE Standard 62.2
- No external panel to install
- Cost-efficient

Warranty: 5 years

Specifications:

Coverage	1,500 – 4,000 ft ²
Adjustable Ventilation Schedule	1 – 60 minutes
Ventilation CFM Range	40 – 150 CFM
Power Requirement	24VAC
Damper Requirement	24VAC, 10VA, power open/spring close actuator
