DESCRIPTION:

The WebComfort WEB-T32P Thermostat is a rugged, industrial control that communicates with the WebComfort Energy Manager. This universal thermostat features an integrated Modbus transceiver that connects to the WebComfort Energy Manager through a secure Zigbee mesh network. This design allows each thermostat to communicate with other thermostats, extending the range and ensuring a strong and reliable signal.

The integrated transceiver with factory wiring harness reduces installation time and eliminates miss-wiring. Additionally, it provides easy access for transceiver diagnostics without having to remove the thermostat sub base.
